- Frameworks & Libraries
- State Management
- Styling & Design
- Interactive Features
- Testing & Optimization
- API Integration:

- Development Tools & WorkflowState Management
- Git, Docker,Postman

Language

- English
- Frensh

Experience

Sep 2024 - 2025

Obens (FrontEnd Dev)

Obens (Next Ts)

Obens is Offering platform for supply chain transparency, combining proof-based traceability with a collaborative framework to monitor sustainability and track commitments along the value chain.

- Designed and implemented a **customizable** dashboard, enabling users to create and visualize their own chart (**Rechart Library**) datasets for enhanced data analysis and decision-making.
- Developed Supply Mapping feature to track orders and batches interactively on a map, (**MapBox**) highlighting all facilities.
- Implemented Risk Monitoring by creating rules to define risks associated with certain variables in the tree structure.

Sep 2023 - Aug 2024

Pronto Ethec (FullStack Dev)

DriveLi (NextTs / NestTs)

A web platform connecting UK learners with local driving instructors, enabling lesson booking, progress tracking, and performance scoring.

- Designing an advanced **calendar** UI from scratch to enable users to effortlessly set and view their schedules.
- Implemented **Stripe** for secure and reliable payment processing.
- Assisted in optimizing key API endpoints for bookings, user management, and performance tracking.
- Developed responsive UI pages and complex workflows using Next.js, including booking and payment features.

Aid Humanity(NextJS with typescript)

A web platform for creating appeals, raising donations, and supporting charitable causes like poverty relief ,emergency aid and other

- Optimized Next.js codebase and implemented new features.
- Maintained the platform, resolving bugs and ensuring reliability.
- Enhanced user experience for donation and appeal management.

Azoom (NextJS with typescript)

An e-commerce platform specializing in the online sale of Islamic books and accessories,

- Rebuilt the front end with Next.js and TypeScript, replacing the original React implementation

Apr 2021 - Sep 2021

Ayour Labs , FrontEnd Dev (ReactJs)

Modern stream

A streaming and tournament platform providing a seamless experience for video content and competitive events.

- Customized the **Video.js library** to enhance playback experience for live streams and recorded clips.
- Built multiple reusable and responsive ReactJS components for key platform features.
